

Java code style

ONAP uses [Google Java Style](#) with some modifications:

- **4.2 Block indentation: +4 spaces**
- **4.4 Column limit: 120**

IDE code formatter configurations can be found in the [Google Style Guide repo](#).

References

From [Setting Up Your Development Environment#ONAPEclipseJavaFormatter](#):

As per https://gerrit.onap.org/r/gitweb?p=aai/aai-common.git;a=blob_plain;f=onap-java-formatter.xml;hb=refs/heads/master, an ONAP Eclipse Java Formatter XML file has been merged and can be imported into Eclipse. Updates to the settings should be committed and merged back into the repository

(e.g.  [AAI-2198](#) - Consistent code style in AAI for maven-checkstyle-plugin (onap-java-style) ). TBC: This should probably be in oparent for all to share.
