

# Portal Platform Project

 The Portal project was moved to "unmaintained" status by the TSC on 08 Apr 2021

[Approved Project Proposal](#)

**Welcome to the Portal Project space.**

The **ONAP Portal** is a platform that provides the ability to integrate different ONAP applications into a centralized Portal Core. It allow decentralized applications to run within their own infrastructure while providing common management services and connectivity. The Portal core provides capabilities including application onboarding & management, centralized access management, and hosted application widgets. Using the provided SDK, application developers can leverage the built-in capabilities (Services / API / UI controls) along with bundled tools and technologies.
