9	Policy Flow support	David Farrelly	<p>Design flow with policy configuration will entail below -</p> <ol style="list-style-type: none"> 1. Parameters that are required to be managed dynamically are identified as policyeditable in spec by MS owner 2. Tools to use spec as input and generate policy model (this step is currently manual) 3. Tools to generate blueprint (type: dcae.nodes.policy or type: clamp.nodes.policy with policy_id input) 4. New models to be added into Policy (currently this is done through SDC distribution; but policy might have other api's which can be used to load the models also I think) 5. Create a policy using this new model (response from policy should include policy_id) 6. During MS blueprint include policy_id as additional input <p>Marco will be doing a demo on steps for CL setup/configuration/deployment on next Control Loop weekly meeting 07/31 (10AM ET)</p> <p>https://zoom.us/j/872748904</p>

Open Action Items

- Henrik Andersson/Yongchao Wu/Joseph O'Leary, Michael Serpico (ms236b@att.com)** - Blueprint-generation tool to be checked with valid Spec files for Dmaap plugin integrated cloudify blueprint
- Tony Hansen/ Vijay Venkatesh Kumar** Follow-up with SECCOM team on xNF authentication/cert management process
- Vijay Venkatesh Kumar** - Followup with SECCOM target/commitment ONAP wide to resolve identified vulnerable libraries.
