

## Opportunities for VVP Newcomers

The following stories, tasks, and bugs have been identified as activities that would be good starting points for new contributors to the VVP project. This is not to say that newcomers are limited to only these stories, but if you are unfamiliar with the project these may be stories that are easy to start with or require less in-depth knowledge of the code and domain.

Please refer to the [Contributing](#) section of the [VVP Documentation](#) for more details on the contribution process itself.
