TSC	TSC: PoC Definition	Benjamin Cheung Alla Goldner	POC definition
TSC	TSC/USE CASES: Test Automation Progress	Benjamin Cheung Alla Goldner	Use Case Test Automation Action Items: Use case subcommittee to reach the Dublin use case owner to provide the following information. what's the current percentage of testing automation regarding your use case and functional requirements; what will be the plan to be 100% and constraints (resources availability etc.)
	R6 Frankfurt / M0		Use Case Tracking Template Need the U/C teams to fill out the Dev. Impacts. More Generalized Use Case Template (discussed w/ Model team): Use Case Tracking Template and Use Case Template
	VID: Service Models Browser Orchestration	James Forsyth user-063b3	VID: Service Models browser - display orchestration type (macro / a'la carte) use-case. This use-case requires us to extend the AAI data-model, with an additional field, related to Service Model. This field will be used later on to indicate in VID the Service Model orchestration type. A&AI Epic 2594 AAI-2594 - AAI: Store orchestration-type parameter as part of model-ver:object CLOSED

VID IMPACTING USE CASES

USE CASE	IMPACTS
PNF / Preonboarding Onboarding	No Impact
PNF / Plug and Play	<p>Migration of existing PNF PnP sub-workflows to a new BB approach (probably we will be creating 4-5 new BBs).</p> <p>VID Impact:</p> <p>Within "old" VID macro orchestration pages, a special field to provide a pnf-id parameter (shall be actually called "correlationID" or "PNF correlationID") has been displayed under the following conditions:</p> <ol style="list-style-type: none"> 1. Service Model contains a PNF resource type. 2. Service type = vCPE <p>When we migrate to BB approach, we'd keep the possibility to provide this parameter to the SO API call as input.</p> <p>How this will change with SO/BB approach, and with new VID GUI targeted at macro (GR) flows – we'd see exactly, after we execute some tests with VID.</p> <p>We'd have to check, what capabilities and conditions could be applied to display and process this "PNF Correlation ID parameter".</p> <p>Can the same BBs could be re-used in "standard" vCPE use-case.</p> <p>We're looking at a generic solution, and we'd probably display this additional field, when we figure out, that there is a PNF resource used in a Service Model.</p> <p>SUMMARY: Can Commit. Nokia will be helping to developing.</p>
PNF / Software Upgrade	<p>VID Trigger PNF S/W upgrade workflow, providing corresponding parameter values</p> <p>Zu has already captured change and needed in ONAP, some features to develop VID to allow input from user to instantiate S/W upgrade of PNFs. Changes and specific to these U/C. VID-505 - update VID GUI to support PNF software upgrade CLOSED</p> <p>SUMMARY: VID can Commit. Question - is Ericsson willing to provide development & efforts. Yes Ericsson will be involved in development.</p>
PNF / Configuration with NetConf	No Impact. The U/C will be updated based on changed in PnP not additional VID impact.

5G / 5G Service Modeling	No Impact
5G / Bulk PM	No Impact, no VID impacted based on the R6 current proposal
5G / PM Dictionary	Will Generic Artifact Browser (existing SDC design studio, GAB) be available in VID? Run Time Usage. SUMMARY: Let's have offline discussion with Damian to answer question. user-063b3
5G / FM Meta Data	Will Generic Artifact Browser (SDC design studio, GAB) be available in VID? SUMMARY: (discuss)
5G / OOF SON (PCI)	Display VID updates to support extensions Not listed in Wiki, need to discuss w/ Ittay. Onboarding SON functionality - Looking at feasibility of existing life cycle of U/C. SON mS triggered by RAN for Config. changes; onboarding to DCAE manually can this SON handler be designed by SDC and then SONaaS automated. No commitment for R6. If this is so, then there might be impact to VID. If designed by VID then modeling CLAMP. NEW Cell Assignment - SON U/C cells are existing already configured; new CELL addition; ONAP may want to assigned PCI to new cell; PCI Assignment; if VID is involved. QUESTION: is Swami committed, will this work be committed? SUMMARY: Might be changes, still designing the U/C. U/C commitment. Probably in Oct. will have more clarity.
5G / E2E Network Slicing	how will slice be instantiated? SO (Seshu) you will require - using svc order API; reach SO through API/external API OSS-BSS client; if you want this external API would be VID change. otherwise need externalAPI w/ OSS-BSS client. How would demonstrate/demo the test? Having VID is probably better choice. From VID perspective ; otherwise new Client SUMMARY: To demo the Network Slice U/C in R6 would want to invoke via VID. POTENTIAL IMPACT. INVESTIGATE.
5G / RAN ORAN 3GPP Standards Harmonization	No Impact
5G / Runtime DB	Display of RunTime DB information; Design Time view of Run Time DB info. No Impact.
5G / NRM CM w/ RESTful HTTPS	No Impact ???
5G / Licensing Management	No Impact
SERVICE RESOLVER	no direct impact; depends on the CFS part - SO handles CFS & RFS there may be VID impact. VId will interact w/ Policy (in the future) SUMMARY: Potential Impact. Still investigation.
SCALING	Listed as Impact on R6 Release Page But No impact stated on Wiki. With scaling, Ittay & Scott has discussed. For R6 probably no impact. Multiple instances (nice to have in R6) but might be a very large change in VID. Does help many providers. SUMMARY: Listed as a stretch goal for R6; if not put on road-map for a future release.
Mobile Service Chaining & Service Selection	No Impact ???
BBS	No Impact (confirmed)
CCVPN	No Impact (confirmed)
Control Loop	No Impact (confirmed)
Multi Domain Optical Service L0/L1 Orchestration	No Impact ???

CHANGE MANAGEMENT	IMPACT (but not described), None Listed but eMail response said potential Chris Rapposelli-Manzo SUMMARY: Investigate Further.
HPA	No Impact ???
RUN TIME SECURITY	No Impact ???
K8S Based Cloud Region Support	No Impact ???
DAaaS	GUI/CLI based configuration of stack ?? (will this be VID change??) SUMMARY: Investigate
3rd Party Operational Domain Manager	IMPACT (but not described) SUMMARY: Ittay will follow-up w/ Nishi.
