2	U p c o m i n g R 6 F u n c t i o n a l R e q u i r e m e n t s	B e n j a m i n C h e u n g	IN PROGRESS	Release 6 (Frankfurt) proposed use cases and functional requirements Use Case Realization Call: September 25, 2019 AAI-2600 - A&AI support of Network Slicing Demo in Frankfurt CLOSED We have created REQ-158 - <i>Network Slice orchestration in R6 Frankfurt</i> for this use case. For AAI impacts, we have created AAI-2600 - <i>A&AI support of Network Slicing Demo</i> details of the AAI impacts, this is still being worked out, as there is an alternative proposal, and we are trying to align w.r.to scope & impacts. We will share more details in the overall use case will also be presented to the Architecture Sub-committee for approval (based on the f2f discussions that happened in Antwerp 2 weeks ago). AAI-2670 - AAI changes in support of 5G/OOF SON (PCI) CLOSED ☒ James Forsyth No status yet, will ask on UCR call today AAI-2671 - AAI changes in support of BBS CLOSED We are currently reviewing the list of items we found in the BBWF BBS testing and once we sort through them we will communicate the results back to ONAP community. Regarding AAI specifically, we do not foresee any new requirements for Frankfurt, but we would like to conclude the review first before jumping to final conclusions. AAI-2672 - AAI changes in support of HPA Continuation CLOSED ☒ James Forsyth No status yet, will ask on UCR call today. Followed up, no representation from use case. Will look for response via email. AAI-2673 - AAI changes in support of K8S Based Cloud Region Support CLOSED We are not expecting any changes at this time. Tech Mahindra is working on populating a&ai with the VNF specific information from K8S. There is a chance that we realize some schema, but we don't expect any changes to the code. AAI-2674 - AAI Changes for 3rd Party Operational Domain Manager CLOSED During run-time solution there are AAI impacts. Run-time solution is not planned for Frankfurt release. Only Import Service Catalog solution in SDC is targeted for F release. AAI Impact highlights: After Service Order decomposition in SO, CFS Service Instance details will be stored in AAI. After response from 3rd Party Domain, RFS instance details will be updated in AAI. The sequence diagram blocked URL depicts the run time view of Third Party Order Activation using the on-boarded service definition and highlights AAI impacts. ReUse in AAI: We plan to leverage the SPPartner model, created for CCVPN, to store the 3rd Party details in AAI. org.onap.aai.domain.yang.SpPartner present in aai-schema v15 ☒ James Forsyth Confirm on UCR call that this is object re-use and test only support from AAI AAI-2623 - CCVPN: MDONS Use Case in Frankfurt CLOSED Have done some prototyping in Dublin to ingest topology from external controllers and show them in A&AI. Will need more work to act on notifications from controllers and keep AAI-2678 - 5G / Bulk PM CLOSED For the 5G Bulk PM use case in R6, I'm attaching a few slides showing how we think AAI can be used as part of the UC realization. We are currently making the following assumptions - PNF and VNF models contain status attribute that can indicate when a new instance has been fully instantiated (may still require update to SO workflow) - AAI will send topology event on AAI-EVENT topic when status attributes are updated Can you review the slides and the assumptions above and let us know if you see any issue. We can also setup a separate meeting if needed. Note: I will share the same slides on the SO weekly meeting today. Unknown Attachment Frankfurt Release Requirements ☒ James Forsyth Follow up on URC call today
3	M i g r a t i o n	A n k i t B h a t	IN PROGRESS	What is the purpose of MigrateCloudRegionUpgradeCycle migrator in onap graphadmin migration framework? ☒ Need William LaMont to check on this by 23 Oct 2019 From Casablanca to Dublin, should these be run? - v14/MigrateMissingFqdnOnPsevers - v13/MigrateVnfModelInvariantId - v13/MigrateModelVer Migration will check if it's already been run, and won't run again. Jira task created to track this: AAI-2689

AAI-2617 - Search guard is no longer available CLOSED Tracking for Frankfurt:  AAI-2677 - Jira project doesn't exist or you don't have permission to view it. Search guard container no longer available so elasticsearch-sg won't build. Search guard allows us to secure the elastic communication, which in older versions was not available. https://www.elastic.co/blog/dear-search-guard-users Consider opendistro as replacement for search-guard Can we consider this one: https://docs.search-guard.com/latest/search-guard-community-edition
7	Nexus IQ	James Forst	IN PROGRESS	Pain, pain, pain. 218 items that must be documented currently across the AAI repos, expanding all the time. 1) We need a repo strategy 2) We need a maintenance strategy 3) We need a versioning strategy 4) We need responsible parties for each repo / component 5) Strategy for oparent dependency management
8	ESR	James Forst	IN PROGRESS	Need to know if the ZTE team who built ESR intends to continue to support this sub-project in Frankfurt. Multiple Jira issues were not worked in Dublin / El Alto, which leads me project might need to be deprecated. Inviting Bo Lv and HuabingZhao to see what the current status is.  AAI-2653 - Update or deprecate the ESR subproject CLOSED  AAI-2640 - Enhance ESR to register/un-register Kubernetes based Cloud regions CLOSED
