	Policy Architecture Review - scheduled for next Tuesday	Pamela Dragosh	NEED updated Swagger from the team for API, PAP.
	Policy Project Team Developer Contribution Requirements	Pamela Dragosh	

ATTENDEES

NOTES

- CLAMP update
  - Sébastien Determe - question versioning of policy model. Must store the Policy Type version into the blueprint.
  - NOTE: When creating a policy from the policy model, please include the "type_version"

-
```
tosca_definitions_version: tosca_simple_yaml_1_0_0
topology_template:
  policies:
    -
        OSDF_CASABLANCA.Affinity_Default:
            type: onap.policies.optimization.resource.AffinityPolicy
            version: 1.0.0 <-- CLAMP does not set this, the policy platform does. This is the
POLICY version. Same in the metadata section policy-version.
            type_version: 1.0.0
            metadata:
                policy-id: OSDF_CASABLANCA.Affinity_Default
                policy-version: 1
            properties:
```

  - question on service information: Not sending service information via the configuration or operational service policies. Will need to update operational/guard policy types to support capturing service metadata. DCAE team will need to update configuration policy to support this also.
    - See also: Control Loop Policy Types Proposal#2: Use a common base Policy Type
- Policy scrum - see wiki above
