4		Discuss developers call time	James Forsyth	OPEN	Tuesdays @ 9 AM US/Eastern, 19:30 India Standard Time
5		SO query in AAI	Shashikanth VH	IN PROGRESS	NNI Use Case - discovering 2 topologies from the network Use case is asking for the ability in AAI to link an underlay and overlay together by having a cousin relationship between 2 PNFs. Asking Chandra Cinthalato verify if that edge the Frankfurt release. Per Chandra: "I think pnf -> pnf edge is redundant and not needed as we can traverse (thru a logical or physical interface) from pnf -> p-interface/l-interface -> pnf." ☐ Shashikanth VH will let the AAI team know if that solves the problem Chandra Cinthala please note: According to Shashikanth VH, the team requires a relationship from an overlay topology node to an underlay topology node; by using the p-inter cannot traverse to underlay node. Suggest to allow an edge for PNFPNF, which is consistent with RFC 8345 model

6		Search guard issue	Giulio Grazaiani	ON HOLD	Merged and released yesterday; issue is closed. AAI-2617 - Search guard is no longer available CLOSED Tracking for Frankfurt: AAI-2677 - Jira project doesn't exist or you don't have permission to view it. Search guard container no longer available so elasticsearch-sg won't build. Search guard allows us to secure the elastic communication, which in older versions was not availa have support for secure communication. https://www.elastic.co/blog/dear-search-guard-users Consider opendistro as replacement for search-guard Can we consider this one: https://docs.search-guard.com/latest/search-guard-community-edition
7		E2E Network Slicing	LINMENG	DONE	For the E2E Network Slicing use case for Frankfurt Release, we intend to leverage the nested service model work that has been going on since Dublin release. From A&AI pers that the schemas would have to be enhanced to cover network slicing models. We have considered A&AI to be a stretch goal for Frankfurt, though we are committing resources start the discussion in the coming weeks, and subsequently implementation work to try our best to complete the implementation for Frankfurt. AAI-2600 has been created just to impacts, we will update it with more details, and also join the A&AI weekly call during the next 1-2 weeks to discuss further.

9		Graph Graph Image Missing in Nexus	Venkata Harish Kajur	OPEN	Graph Graph Images are missing from nexus and it needs to be resolved in order for elalto deployment to be successful. OOM-2161 How did this docker image get pushed to nexus and why was it removed from nexus? Graphgraph was removed from the default helm chart, but we still need to get these jobs fixed. James Forsythwill look at it and ask Pavel Paroulekfor guidance on this - looks like some jjbs are missing and configs are probably wrong, too. Ondrej Frindrich will reach out to Pavel and see if we can figure out why the build and stage jobs are failing.

Unknown Attachment We have created *REQ-158* - for this use case. For AAI impacts, we have created *AAI-2600 - A&AI support of Network Frankfurt*.Reg. details of the AAI impacts, this is still being worked out, as there is an alternative proposal, and we are trying to align w.r.to scope & impacts. We will share more days. The overall use case will also be presented to the Architecture Sub-committee for approval (based on the f2f discussions that happened in Antwerp 2 weeks ago). ~~AAI-2670~~ - AAI changes in support of 5G/OOF SON (PCI) CLOSED ☑ James Forsyth No status yet, will ask on UCR call today ~~AAI-2671~~ - AAI changes in support of BBS CLOSED We are currently reviewing the list of items we found in the BBWF BBS testing and once we sort through them we will communicate the results back to ONAP community. Regarding AAI specifically, we do not foresee any new requirements for Frankfurt, but we would like to conclude the review first before jumping to final conclusions. ~~AAI-2672~~ - AAI changes in support of HPA Continuation CLOSED ☑ James Forsyth No status yet, will ask on UCR call today. Followed up, no representation from use case. Will look for response via email. ~~AAI-2673~~ - AAI changes in support of K8S Based Cloud Region Support CLOSED We are not expecting any changes at this time. Tech Mahindra is working on populating a&ai with the VNF specific information from K8S. There is a chance that we realize som schema, but we don't expect any changes to the code. ~~AAI-2674~~ - AAI Changes for 3rd Party Operational Domain Manager CLOSED During run-time solution there are AAI impacts. Run-time solution is not planned for Frankfurt release. Only Import Service Catalog solution in SDC is targeted for F release. AAI Impact highlights: After Service Order decomposition in SO, CFS Service Instance details will be stored in AAI. After response from 3^rd^ Party Domain, RFS instance details will be updated in AAI. The sequence diagram blocked URL depicts the run time view of Third Party Order Activation using the on-boarded service definition and highlights AAI impacts. ReUse in AAI: We plan to leverage the SPPartner model, created for CCVPN, to store the 3^rd^ Party details in AAI. org.onap.aai.domain.yang.SpPartner present in aai-schema v15 ☑ James Forsyth Confirm on UCR call that this is object re-use and test only support from AAI ~~AAI-2623~~ - CCVPN: MDONS Use Case in Frankfurt CLOSED Have done some prototyping in Dublin to ingest topology from external controllers and show them in A&AI. Will need more work to act on notifications from controllers and keep ~~AAI-2678~~ - 5G / Bulk PM CLOSED For the 5G Bulk PM use case in R6, I'm attaching a few slides showing how we think AAI can be used as part of the UC realization. We are currently making the following assur • PNF and VNF models contain status attribute that can indicate when a new instance has been fully instantiated (may still require update to SO workflow) • AAI will send topology event on AAI-EVENT topic when status attributes are updated Can you review the slides and the assumptions above and let us know if you see any issue. We can also setup a separate meeting if needed. Note: I will share the same slides on the SO weekly meeting today. ? Unknown Attachment Frankfurt Release Requirements ☑ James Forsyth Follow up on URC call today
