

# DCAE Pair Wise Testing for Frankfurt Release

| Project Name                      |                                                                                   | OOM    | Notes                                                  |
|-----------------------------------|-----------------------------------------------------------------------------------|--------|--------------------------------------------------------|
| Health Check                      |                                                                                   | Passed | Based on gating jobs on OOM (as of 03/24)              |
| Data flows for all use case       | VES data reception (VNF to VES simulated)                                         | Passed | <a href="#">VES-Flows_PairwiseTest_Logs.txt</a>        |
|                                   | VES TCA , via DMaaP                                                               | Passed | (results captured on log above)                        |
|                                   | TCA Policy, via DMaaP                                                             | Passed | (results captured on log above)                        |
|                                   | DCAE (TCA) AAI, via API                                                           | NA     | Note: To be validated part of integration test         |
|                                   | DCAE (VES) Holmes (track metrics data), via DMaaP                                 | NA     | Note: To be validated part of integration test         |
|                                   | VES TCA-gen2                                                                      | Passed | (results captured on log above)                        |
|                                   | TCA-gen2 Policy via DMaaP                                                         | Passed | (results captured on log above)                        |
| Control flow for supporting CLAMP | DCAE CLAMP (CLAMP trigger blueprint deployment) , via DCAE Deployment Handler API | Passed | <a href="#">0401-CLAMP-deploy_undeploy.txt</a>         |
|                                   | SDC DCAE (blueprint distribution from SDC to DCAE Service Change Handler)         | Passed | Validated in SB01<br><a href="#">0401-SCH-Logs.txt</a> |
|                                   | DCAE (Policy Handler) Policy, via API Retrieval                                   | Passed | <a href="#">0401-DCAE-POLICY.txt</a>                   |
|                                   | Policy DCAE (Policy Handler), update notification via DMaaP                       | Passed | <a href="#">0402-Policy-UpdateFlow.txt</a>             |

| ONAP Bootstrapped services (non-usecase specific) |                                                                                                                                           |        |                                                                                                                   |
|---------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------|--------|-------------------------------------------------------------------------------------------------------------------|
| PNF Reg Flows                                     | VES PRH, via DMaaP                                                                                                                        | Passed |  <p>pnf-registrate.tar.xz</p> |
|                                                   | PRH AAI, via API                                                                                                                          | Passed | logs in the file above                                                                                            |
|                                                   | PRH SO, via DMaaP                                                                                                                         | N/A    |                                                                                                                   |
|                                                   | Note: Scope of this test is to validate DMaaP notification /structure (E2E PNF registration flow to be verified during integration phase) |        |                                                                                                                   |

|        |                                     |            |                                                                                                                  |
