14	S O qu er y in A AI	Shashikanth VH	DONE	<p>NNI Use Case - discovering 2 topologies from the network</p> <p>Use case is asking for the ability in AAI to link an underlay and overlay together by having a cousin relationship between 2 PNFs. Asking Chandra Cinthala to verify if that edge is Frankfurt release.</p> <p>Per Chandra: "I think pnf -> pnf edge is redundant and not needed as we can traverse (thru a logical or physical interface) from pnf -> p-interface/l-interface -> pnf."</p> <p><input type="checkbox"/> Shashikanth VH will let the AAI team know if that solves the problem</p> <p>Chandra Cinthala please note: According to Shashikanth VH, the team requires a relationship from an overlay topology node to an underlay topology node; by using the p-interface to underlay node. Suggest to allow an edge for PNF to PNF, which is consistent with RFC 8345 model</p>

16	E 2 E N et w ork Sli ci ng	LI ME NG	DONE	<p>For the E2E Network Slicing use case for Frankfurt Release, we intend to leverage the nested service model work that has been going on since Dublin release. From A&AI perspective the schemas would have to be enhanced to cover network slicing models. We have considered A&AI to be a stretch goal for Frankfurt, though we are committing resources. So discussion in the coming weeks, and subsequently implementation work to try our best to complete the implementation for Frankfurt. AAI-2600 has been created just to indicate update it with more details, and also join the A&AI weekly call during the next 1-2 weeks to discuss further.</p>
