Release Components Name

Components Name	Components Repository name	Maven Group ID	Components Description
-----------------	----------------------------	----------------	------------------------

aai-common	aai/aai-common	org.onap.aai.aai-common	This holds the model, annotations and common modules used across the Resources and Traversal micro services
data-router	aai/data-router	org.onap.aai.data-router	AAI Micro Service used to route/persist AAI event data for consumption by the UI
logging-service	aai/logging-service	org.onap.aai.logging-service	AAI common logging library
model-loader	aai/model-loader	org.onap.aai.model-loader	Loads SDC Models into A&AI
resources	aai/resources	org.onap.aai.resources	AAI Resources Micro Service providing CRUD REST APIs for inventory resources
rest-client	aai/rest-client	org.onap.aai.rest-client	Library for making REST calls
router-core	aai/router-core	org.onap.aai.router-core	Library containing the core camel components for the data router
search-data-service	aai/search-data-service	org.onap.aai.search-data-service	Service for persisting data to a search database
sparky-be	aai/sparky-be	org.onap.aai.sparky-be	AAI user interface back end
sparky-fe	aai/sparky-fe	org.onap.aai.sparky-fe	AAI user interface front end
sparky_ext	aai/sparky_ext	org.onap.aai-sparky_ext	We need a separate repo for code that will extend the AAI UI. This provides multiple views that will be of use to operations teams, and we cannot use an existing repo since ECOMP seed code is contained in a repo called "sparky_ext"
test-config	aai/test-config	org.onap.aai.test-config	Repository containing test configuration for use in continuous integration
traversal	aai/traversal	org.onap.aai.traversal	AAI Traversal Micro Service providing REST APIs for traversal/search of inventory resources
babel	aai/babel	org.onap.aai.babel	AAI Microservice to generate AAI model XML from SDC TOSCA CSAR artifacts
esr-server	aai/esr-server	org.onap.aai.esr-server	ESR backend, mainly include the function of external system reachable check and data pretreatment
esr-gui	aai/esr-gui	org.onap.aai.esr-gui	External system management ui
event-client	aai/event-client	org.onap.aai.event-client	Library to manage interactions with an event bus
graphadmin	aai/graphadmin	org.onap.aai.graphadmin	Microservice with various functions for graph management
cache	aai/cache	org.onap.aai.cache	The Response Caching Microservice (Cache) is built to deliver multiple mechanisms of making API calls and populating the responses into a JSON datastore
validation	aai/validation	org.onap.aai.validation	Microservice used to invoke validation mechanism
schema-service	aai/schema-service	org.onap.aai.schema-service	Microservice to provide centralized run-time schema information for AAI's microservice
graphgraph	aai/graphgraph	org.onap.aai.graphgraph	Microservice used to provide view of AAI model, schema and edge rules
oom	aai/oom	org.onap.aai.oom	AAI's helm chart repo, is a submodule of the oom project, but will be brought back into the main project in the Guilin release. This will need to remain open for as long as Frankfurt and El Alto are supported and then can be locked.
spike	aai/spike	org.onap.aai.spike	Microservice used to generate events describing changes to the graph data (deprecated)
tabular-data-service	aai/tabular-data-service	org.onap.aai.tabular-data-service	Microservice which serves as an abstraction layer to a tabular data store (deprecated)
gap	aai/gap	org.onap.aai.gap	A get and publish microservice which extracts entities from A&AI and publishes them to an event topic (deprecated)
eis	aai/eis	org.onap.aai.eis	Microservice used to manage entity identities across systems (deprecated)
chameleon	aai/chameleon	org.onap.aai.chameleon	Abstraction service for historical database (deprecated)
gallifrey	aai/gallifrey	org.onap.aai.gallifrey	Transformation service between AAI-modelled data, operations and gallifrey representation (deprecated)

enricher	aai/enricher	org.onap.aai.enricher	Enables complementing AT&T data with federated data from additional sources (deprecated)
aai-service	aai/aai-service	org.onap.aai.service	AAI REST based services (deprecated)
aai-config	aai/aai-config	org.onap.aai.aai-config	AAI Chef cookbooks
aai-data	aai/aai-data	org.onap.aai.aai-data	AAI Chef environment files (deprecated)
gizmo	aai/gizmo	org.onap.aai.gizmo	CRUD Rest API endpoint for resources and relationships, delivering atomic interactions with the graph for improved scalability. (deprecated)
champ	aai/champ	org.onap.aai.champ	Abstraction from underlying graph storage systems that A&AI would interface with.(deprecated)

Application Authorization Framework

Release Artifacts

Facts	Info
PTL (first and last name)	Jonathan Gathman
Jira Project Name	Application Authorization Framework
Jira Key	AAF
Project ID	aaf
Gerrit Repository (ies) URL	https://gerrit.onap.org/r/#/admin/projects/authz https://gerrit.onap.org/r/#/admin/projects/aaf/cadi https://gerrit.onap.org/r/#/admin/projects/aaf/sms https://gerrit.onap.org/r/#/admin/projects/aaf/sshsm
Link to Wiki Space	Application Authorization Framework Project

Release Components Name

Components Name		Components Repository name	Maven Group ID	Components Description
authz		aaf/authz	org.onap.aaf.authz	This module is used to organize all of the common artifacts and capabilities that are inherited by all modules. This prevents duplication of these common artifacts, plugins. All Microservices run from the same code/builds, etc, but with slightly different start mechanisms:
	aaf-service			Core AAF Service - This RESTful API based service accepts Authentication and Authorization Queries, as well as Management of Namespaces, Roles, Permissions, Credentials
	aaf-locate			Locate - tracks all registered instances Globally of public services running anywhere, regardless of container type, bare metal, etc. by name and version. Clients use this to talk to the closest entry. [Dublin - this will also track internally for Container based names/ports]
	aaf-oauth			OAuth support for Token Creation and Introspection. AAF's OAuth can also serve as a delegate OAuth model
	aaf-cm			Certificate Manager - This is a Registration Authority to talk to an External CA, and create Certificates with authorized, embedded Organization info for fast/secure Authentication. For ONAP, Certificate Manager also serves as the CA for Beijing through Dublin.
	aaf-gui			Graphical User Interface - AAF's GUI allows for viewing and command of all API functions, and is protected by AAF or Company defined Authentication as well as AAF Authorization.
	aaf-agent			Command line based tool that allows manual, script based automation and K8S based Container generation of Configuration and Certificates.
cadi		aaf/cadi	org.onap.aaf.cadi	Collection of Authentication and Authorization Plugins , technology specific clients, configuration tooling and encryption tooling, designed to enable Services to quickly and securely integrate Security.
	shiro	shiro	org.onap.aaf.cadi.aaf-shiro	Shiro Plugin
		shiro-osgi-bundle	org.onap.aaf.cadi.aaf-shiro-aafrealm-osgi-bundle	Separate built bundle for Shiro and OSGI
inno		This Repository is Deprecated... Coordinating with HelpDesk on best time to remove		

luaplugin	aaf/luaplugin	org.onap.aaf.luaplugin	A lua plugin to integrate AAF with MSB, which provides centralized auth features at the API Gateway.
sms	aaf/sms	org.onap.aaf.sms	Secret Management Service that will contain the webservice as well as client code for managing and accessing secrets.
sshsm	aaf/sshsm	org.onap.aaf.sshsm	A repository for softsm modifications and hardware security plugin

Link to Wiki Space	Data Movement as a Platform Project

Release Components Name

Components Name	Components Repository name	Maven Group ID	Components Description
messagerouter	dmaap/messagerouter/msgtr	org.onap.dmaap.messagerouter.msgtr	Provides REST API for messaging. It is built on top of Apache Kafka.

datarouter	dmaap/datarouter	org.onap.dmaap.datarouter	The Data Routing System project is intended to provide a common framework by which data producers can make data available to data consumers and a way for potential consumers to find feeds with the data they require. The interface to DR is exposed as a RESTful web service known as the DR Publishing and Delivery API
dbcapi	dmaap/dbcapi	org.onap.dmaap.dbcapi	Provides a northbound REST API to ONAP clients to manage DMaaP resources. This includes DMaaP components such as MR and DR, as well as provisioning of topics and feeds. Southbound, it communicates with the respective component APIs.
buscontroller	dmaap/buscontroller	org.onap.dmaap.buscontroller	It is a docker container that implements the dbcapi. It optionally can be deployed in a persistent mode which relies on PGaaS, in which case multiple containers can also be deployed for scale/availability.
messageservice	dmaap/message router/messageservice	org.onap.dmaap.message router.messageservice	Creates a service for Message Router in a container
dmaapclient	dmaap/message router/dmaapclient	org.onap.dmaap.message router.dmaapclient	It's a message router client. uses DME2 (Direct Messaging Engine) library to locate the end point.
mirroragent	dmaap/message router/mirroragent	org.onap.dmaap.messagerouter.mirroragent	Replicates Message Router clusters (copies data from one cluster to another)
kafka11aaf	dmaap/kafka11aaf	org.onap.dmaap.kafka11aaf	Creates the AAF plugin for Kafka and creates the Kafka image with the AAF plugin
zookeeper	dmaap/zookeeper	org.onap.dmaap.zookeeper	Creates the Zookeeper image for the DMaaP Message Router

Release Components

Component group	Component Name	Component Repository name	Maven Group ID	Components Description
integration	integration	integration	org.onap.integration	Integration framework, automated tools, code and scripts, best practice guidance related to cross-project Continuous System Integration Testing (CSIT), and delivery of ONAP.
	seccom	seccom	org.onap.integration-seccom	This repo holds web pages and scripts useful to the ONAP Security Sub Committee for tracking and managing the progress of ONAP projects towards meeting their Security requirements each release.
	csit	csit	org.onap.integration-csit	This repo holds all the Continuous System Integration Testing (CSIT) configuration for all ONAP projects.
	xtesting	xtesting	N.R	This repo aims to build testing docker per category as defined in Integration categories & testsuites discussions
	docker	onap-baseline	org.onap.integration.docker.baseline	Repo to host Docker file aimign to produce a baseline image usabel by all the ONAP projects. This image shall be based on a reference image, multi-arch, maintained (fixing security vulnerabilities), providing n onap user
		onap-java11	org.onap.integration.docker.java	idem baseline + including java 11
		onap-python3	org.onap.integration.docker.python	idem baseline + including python3
	usecases	bbs	org.onap.integration.usecases.bbs	Repository to host BBS use case code. This code is currently under demo with all the other use cases. The demo repository will become hard to maintain. It makes sens to create dedicated repo for dedicated project. (BBS Broadband Service Use Case Frankfurt)
		mdons	org.onap.integration.mdons	Repository to host the MDONS use case code.(MDONS Integration Test Case)
	simulators	ran-simulator	org.onap.integration.ran-simulator	Host Ran simulators introduced in Frankfurt
		dc-simulator	org.onap.integration.dc-simulator	Host DC simulator introduced in Frankfurt for MDONS use case
		pnf-simulator	org.onap.integration.pnf-simulator	HOST PNF simulator introduced in first ONAP versions in integration repository
demo	demo	demo	org.onap.demo	Demo applications and templates for ONAP platform instantiation.
testsuite	testsuite	testsuite	org.onap.testsuite	Test Suite Parent Project. Contains and holds all the ETE robot tests.
	heatbridge	testsuite/heatbridge	org.onap.testsuite.heatbridge	Temporary heatbridge used to stitch together some holes in the ONAP ETE tests for release one.
	properties	testsuite/properties	org.onap.testsuite.properties	Stores properties used by robot framework. These are non-test-specific ONAP properties.
	python-testing-utils	testsuite/python-testing-utils	org.onap.testsuite.python-testing-utils	Python testing utils used by the robot framework. Installable as a pip package but not intended to be generally usable.
	pythonsdk-tests	testsuite/pythonsdk-tests	org.onap.testsuite.pythonsdk-tests	Integration E2E tests done by leveraging python onapsdk
	robot-utils	testsuite/robot-utils	org.onap.testsuite.robot-utils	Middleware to provide python-onapsdk functions to robot developers in order to harmonise and simplify the writting of robot tests
oparent	oparent	oparent	org.onap.oparent	OParent provides common default settings for all the projects participating in simultaneous release.
	oparent-cia	oparent/cia	org.onap.oparent.cia	Dockerfile optimization and best practices
ci-management	ci-management	ci-management	org.onap.ci-management	Management repo for Jenkins Job Builder, builder scripts and management related to the CI configuration.

Achived Components

Component Name	Component Repository name	Maven Group ID	Archive date	Components Description
devtool	integration /devtool	org.onap.integration	11/2019	This project provides an automated tool for provisioning ONAP development environment. It covers some common development tasks such as cloning source code repositories, compiling java artifacts and

		-devtool		building Docker images. This has been vehicle to standardize development process and dependencies associated with their components through an automated provisioning mechanism.
benchmark	integration /benchmark	org.onap. integraton - benchmark	11/2019	This repo holds all the script and testing results from benchmark sub-project.

Logging Enhancements

On June 9th, 2020 - the ONAP TSC approved the Logging Project Path Forward Proposal (v6)

The Logging project is no more an active project.

The following repositories that are necessary for the ONAP Components will continue to be maintained.

<https://gerrit.onap.org/r/gitweb?p=logging-analytics.git;a=tree;f=reference/logging-filter;h=78d5995fd54b580fbda4245ccfdee26504a45a30;hb=refs/heads/master>

<https://gerrit.onap.org/r/gitweb?p=logging-analytics.git;a=tree;f=reference/logging-slf4j;h=aac6f850373892b1da131405521d527751588f8e;hb=refs/heads/master>

<https://gerrit.onap.org/r/gitweb?p=logging-analytics.git;a=tree;f=pylog;hb=HEAD>

Release Artifacts

Facts	Info
PTL (first and last name)	None
Jira Project Name	Logging analytics
Jira Key	LOG
Project ID	log
Gerrit Repository (ies) URL	https://gerrit.onap.org/r/#/admin/projects/logging-analytics
Link to Wiki Space	Logging Enhancements Project

Release Components Name

Components Name	Components Repository name	Maven Group ID	Components Description
logging-analytics	logging-analytics	org.onap.logging-analytics	A reference analytics pipeline configuration
pomba-context-aggregator (deprecated)	logging-analytics/pomba/pomba-context-aggregator	org.onap.pomba.pomba-context-aggregator <i>(all below previously org.onap.pomba) with differentiators in the Maven artifact ID)</i> 20180803: may be refactored as org.onap.logging-analytics.pomba.pomba-* for all these 6 repos	Orchestrates calls to various context builders and aggregates data from various data sources into one single payload
pomba-aai-context-builder (deprecated)	logging-analytics/pomba/pomba-aai-context-builder	org.onap.pomba.pomba-aai-context-builder	AAI Context builder. Interacts with A&AI and transforms A&AI data into common model structure
pomba-sdc-context-builder (deprecated)	logging-analytics/pomba/pomba-sdc-context-builder	org.onap.pomba.pomba-sdc-context-builder	SDC Context builder. Interacts with SDC and transforms SDC TOSCA CSAR into common model structure
pomba-sdnc-context-builder (deprecated)	logging-analytics/pomba/pomba-sdnc-context-builder	org.onap.pomba.pomba-sdnc-context-builder	SDN-C Context Builder. Interacts with SDN-C and transforms SDN-C data into common model structure
pomba-network-discovery-context-builder (deprecated)	logging-analytics/pomba/pomba-network-discovery-context-builder	org.onap.pomba.pomba-network-discovery-context-builder	Network Discovery Context Builder. Interacts with Network discovery component and transforms its data into common model structure

pomba-audit-common (deprecated)	logging-analytics/pomba/pomba-audit-common	org.onap.pomba.pomba-audit-common	POJO project. Holds POMBA common model POJO representation
---------------------------------	--	-----------------------------------	--

Microservices Bus

Release Artifacts

Facts	Info
PTL (first and last name)	Huabing Zhao
Jira Project Name	Microservices Bus
Jira Key	MSB
Project ID	msb
Gerrit Repository (ies) URL	https://gerrit.onap.org/r/#/admin/projects/msb/apigateway https://gerrit.onap.org/r/#/admin/projects/msb/discovery
Link to Wiki Space	Microservices Bus Project

Release Components Name

Components Name	Components Repository name	Maven Group ID	Components Description
apigateway	msb/apigateway	org.onap.msb.apigateway	Service API gateway which provides client request routing, client request load balancing, transformation, such as https to http, authentication & authorization for service request with plugin of auth service provider,service request logging,service request rate-limiting,service monitoring,request result cache,solve cross-domain issue for web application and other functionalities with the pluggable architecture capability.
discovery	msb/discovery	org.onap.msb.discovery	Provides service registration and discovery for ONAP microservices, which leverage Consul and build an abstract layer on top of it to make it agnostic to the registration provider and add the needed extension.
java-sdk	msb/java-sdk	org.onap.msb.java-sdk	Provides a JAVA SDK for rapid microservices development, including service registration, service discovery, request routing, load balancing, retry, etc.
swagger-sdk	msb/swagger-sdk	org.onap.msb.swagger-sdk	Swagger sdk helps to generate swagger.json and java client sdk during the build time, it also helps to provide the swagger.json at the given URI in the run time.
service-mesh	msb/service-mesh	org.onap.msb.service-mesh	Service mesh (Istio) related source codes, which includes the following: - Istio installation scripts for ONAP - MSB Istio integration codes - UI portal codes to facilitate routing rule management

- Other gule scripts for Istio integration

MUSIC

Release Artifacts

Facts	Info
PTL (first and last name)	Bharath Balasubramanian
Jira Project Name	Music
Jira Key	MUSIC
Project ID	music
Gerrit Repository (ies) URL	

Release Components Name

Component Name	Component Repository	Group ID	Components Description
music	music	org.onap.music	This repo contains the code for a multi-site coordination service (MUSIC) and associated recipes that enables efficient, highly available state-management across geo-redundant sites.
distributed-kv-store	music/distributed-kv-store	org.onap.music.distributed-kv-store	Source code to read initial configuration data into KV Store.
prom	music/prom	org.onap.music.prom	MUSIC provides a recipe for policy-driven ownership management (prom) of state for ONAP components to (1) partition state across replicas during both initial placement and during failures based on their individual policies (2) ensure correct transfer of state ownership across replicas during site failures and network partitions (3) ensure that the new owner has access to the most recent version of state (if needed).
mdbc	music/mdbc	org.onap.music.mdbc	The most crucial recipe is a multi-site database cache (mdbc) that enable ONAP components that maintain state in a SQL database to avail the benefits of MUSIC without compromising their need to use transactional SQL DBs. These ONAP components can rely on existing db clustering techniques like MariaDB for transactionality and complex querying within a site. mdbc will intercept each of these read/write calls to the db cluster and mirror this state to other geo-distributed sites through MUSIC either synchronously or asynchronously (configurable at a table-level). For example, components like the ONAP Service Orchestrator that use MariaDB to maintain state can directly use this recipe with no change to their SQL code.

ONAP Operations Manager

Release Artifacts

Facts	Info
PTL (first and last name)	Sylvain Desbureaux
Jira Project Name	ONAP Operations Manager
Jira Key	OOM
Project ID	oom
Gerrit Repository (ies) URL	https://gerrit.onap.org/r/#/admin/projects/oom
Link to Wiki Space	ONAP Operations Manager Project

Release Components Name

Components Name	Components Repository name	Maven Group ID	Components Description
oom	oom	org.onap.oom	Introduces the ONAP Platform OOM (ONAP Operations Manager) to efficiently Deploy, Manage, Operate the ONAP platform and its components (e.g. MSO, DCAE, SDC, etc.) and infrastructure (VMs, Containers).
offline-installer	oom/offline-installer	org.onap.oom.offline-installer	This repo contains SRC code for offline installer solution. It can be primarily used for ONAP offline deployments using OOM charts however it can be used for other offline deployments as well as it's concept is quite generic.
registrator	oom/registrator	org.onap.oom.registrator	Register the service endpoints to MSB so it can be used for service request routing and load balancing. Registrator puts service endpoints info to MSB discovery module(Consul as the backend) when an ONAP component is deployed by OOM, and update its state along with the life cycle, such as start, stop, scaling, etc.
readiness	oom/readiness	org.onap.oom.readiness	Code for the "readiness" container which allow to wait a deployment / job / statefulset / daemonset to be up before starting another component

Policy Framework

Release Artifacts

Facts	Info
PTL (first and last name)	Jim Hahn
Jira Project Name	Policy Framework
Jira Key	policy
Project ID	policy
Gerrit Repository (ies) URL	https://gerrit.onap.org/r/#/admin/projects/policy/common https://gerrit.onap.org/r/#/admin/projects/policy/docker https://gerrit.onap.org/r/#/admin/projects/policy/drools-applications https://gerrit.onap.org/r/#/admin/projects/policy/drools-pdp https://gerrit.onap.org/r/#/admin/projects/policy/engine https://gerrit.onap.org/r/#/admin/projects/policy/api https://gerrit.onap.org/r/#/admin/projects/policy/pap https://gerrit.onap.org/r/#/admin/projects/policy/models https://gerrit.onap.org/r/#/admin/projects/policy/xacml-pdp https://gerrit.onap.org/r/#/admin/projects/policy/apex-pdp https://gerrit.onap.org/r/#/admin/projects/policy/distribution
Link to Wiki Space	Policy Framework Project

Release Components Name

Components Name	Components Repository name	Maven Group ID	Components Description
Policy Engine	policy/engine	org.onap.policy.engine	This is the Policy GUI, API front end, PAP backend, XACML PDP and portal implementation.
Policy Drools PDP	policy/drools-pdp	org.onap.policy.drools-pdp	This is the Drools PDP engine.
Drools application	policy/drools-applications	org.onap.policy.drools-applications	This is the template/model/rule support code for Drools PDP engine.
docker	policy/docker	org.onap.policy.docker	Policy docker support code. (Beijing, Casablanca)
common	policy/common	org.onap.policy.common	Common code (Beijing)
parent	policy/parent	org.onap.policy.parent	Parent code that holds the pom.xml to build all the repos (Casablanca)
Lifecycle API	policy/api	org.onap.policy.api	API definition code (Casablanca)
Policy Administration Point	policy/pap	org.onap.policy.pap	This repo will hold next generation PAP implementation (Casablanca)
Model code	policy/models	org.onap.policy.models	This repo will hold model code agnostic to PDP engines (Casablanca)
XACML PDP (next gen)	policy/xacml-pdp	org.onap.policy.xacml-pdp	This repo will hold the next generation XACML PDP engine (Casablanca)
Apex PDP	policy/apex-pdp	org.onap.policy.apex-pdp	This repo will hold the next generation Apex PDP engine (Casablanca)
SDC Distribution Integration	policy/distribution	org.onap.policy.distribution	This repo will hold the SDC Service Distribution code (Casablanca)
Policy OOM	policy/oom		This repo will hold Policy K8S Helm Charts.

Service Design & Creation

Release Artifacts

Facts	Info
PTL (first and last name)	Christophe Closset
Jira Project Name	Service Design and Creation
Jira Key	SDC
Project ID	sdc
Gerrit Repository (ies) URL	https://gerrit.onap.org/r/admin/repos/sdc
Link to Wiki Space	Service Design & Creation Project

Release Components Name

Components Name	Components Repository name	Maven Group ID	Components Description
sdc	sdc	org.onap.sdc	SDC Parent Project Catalog FE and BE
tosca	sdc/tosca	org.onap.sdc.jtosca	A generic TOSCA parser based on the TOSCA 1.1 spec
distribution-client	sdc/sdc-distribution-client	org.onap.sdc.sdc-distribution-client	SDC Distribution Client
titan-cassandra	sdc/sdc-titan-	org.onap.sdc.titan-	SDC Rebase Cassandra

	cassandra	cassandra	
sdsc-tosca	sdsc/sdsc-tosca	org.onap.sdsc.sdsc-tosca	A TOSCA parser, based on JTOSCA generic parser and complying with the ONAP SDC TOSCA model
sdsc-dockers-base	sdsc/sdsc-docker-base	org.onap.sdsc.sdsc-docker-base	SDC base docker creation project
sdsc-vnfdesign	sdsc/sdsc-vnfdesign	org.onap.sdsc.sdsc-vnfdesign	A graphic design tool for TOSCA based VNF
sdsc-workflowdesign	sdsc/sdsc-workflow-designer	org.onap.sdsc.sdsc-workflow-designer	A graphic design tool for service life cycle management workflow design
onap-ui-common	sdsc/onap-ui-common	org.onap.sdsc.onap-ui-common	A common UI library containing different components, fonts and styles used by SDC and the different designers in order to create a single look and feel across SDC
onap-ui-angular	sdsc/onap-ui-angular	org.onap.sdsc.onap-ui-angular	An Angular UI library containing different components, fonts and styles used by SDC and the different designers in order to create a single look and feel across SDC
onap-ui-react	sdsc/onap-ui-react	org.onap.sdsc.onap-ui-react	A React UI library containing different components, fonts and styles used by SDC and the different designers in order to create a single look and feel across SDC
sdsc-pubsub	sdsc/sdsc-pubsub	org.onap.sdsc.sdsc-pubsub	Publish Subscribe library using post message for sdsc plugins.
dcae-dt-be-main	sdsc/dcae-d/dt-be-main	org.onap.sdsc.dcae-d.dt-be-main	DCAE Designer Back End Logic
dcae-dt-be-property	sdsc/dcae-d/dt-be-property	org.onap.sdsc.dcae-d.dt-be-property	DCAE Designer common datatypes and properties
dcae-fe	sdsc/dcae-d/fe	org.onap.sdsc.dcae-d.fe	DCAE Designer Front End UI
dcae-rule-engine	sdsc/dcae-d/rule-engine	org.onap.sdsc.dcae-d.rule-engine	DCAE Designer Rule Engine Front End UI
dcae-ci	sdsc/dcae-d/ci	org.onap.sdsc.dcae-d.ci	DCAE Designer End To End Testing suite
dcae-tosca-lab	sdsc/dcae-d/tosca-lab	org.onap.sdsc.dcae-d.tosca-lab	DCAE Designer Tosca Lab tool to create Blueprint and Generate Tosca models
dcae tab	sdsc/dcae-d/dt	org.onap.sdsc.dcae-d.dt	DCAE tab ui designer
sdsc-be-common	sdsc/sdsc-be-common	org.onap.sdsc.sdsc-be-common	A common BE library across SDC modules

Release Components Name

Components Name	Components Repository name	Maven Group ID	Components Description
LCM	vfc/nfvo/lcm	org.onap.vfc.nfvo.lcm	NS lifecycle management
Resource Mgr	vfc/nfvo/resmanagement	org.onap.vfc.nfvo.resmanagement	NS Resource Management
S-VNFM Driver	vfc/nfvo/driver/vnfm/svnfm	org.onap.vfc.nfvo.driver.vnfm.svnfm	Specific VNFM drivers
G-VNFM Driver	vfc/nfvo/driver/vnfm/gvnfm	org.onap.vfc.nfvo.driver.vnfm.gvnfm	Generic VNFM driver
SFC Driver	vfc/nfvo/driver/sfc	org.onap.vfc.nfvo.driver.sfc	SFC Driver
Work flow engine	vfc/nfvo/wfengine	org.onap.vfc.nfvo.wfengine	Work flow engine
Catalog	vfc/nfvo/catalog	org.onap.vfc.nfvo.catalog	NS and VNF catalog
EMS-driver	vfc/nfvo/driver/ems	org.onap.vfc.nfvo.driver.ems	VNF fcaps collect
Gvnfm vnflcm	vfc/gvnfm/vnflcm	org.onap.vfc.gvnfm.vnflcm	Generic VNFM VNF LCM
Gvnfm vnfmgr	vfc/gvnfm/vnfmgr	org.onap.vfc.gvnfm.vnfmgr	Generic VNFM VNF Mgr
Gvnfm vnfres	vfc/gvnfm/vnfres	org.onap.vfc.gvnfm.vnfres	Generic VNFM VNF Resource Management
multivimproxy	vfc/nfvo/multivimproxy	org.onap.vfc.nfvo.multivimproxy	Multi-vim proxy, provide the multivim indirect mode proxy which can forward virtual resource requests to multivim and do some resource checking
DB-service	vfc/nfvo/db	org.onap.vfc.nfvo.db	Stand-alone database microservice, provides the database services for each VF-C component
