

VNF Requirements Project

VNF Requirements are published with each release. You can find them in the general ONAP released documentation at docs.onap.org

The versions are selectable by release (look for the "v: Amsterdam" pulldown menu in lower right). The latest version is [here](#).

Release notes are available [here](#).

A consolidated list of all requirements is provided in Chapter 9 for use in RFP responses etc.

From the Beijing Release, there is additional information on Test Case Descriptions and associated VNF requirements available [here](#).

To comment on VNFRQTS deliverables either raise a JIRA bug report or send an email to the [onap-discuss](#) list with "[vnfrqts]" in the subject line

Approved Project Proposal

Release Planning

Tasks

See [VNFRQTS JIRA Project](#)

Agenda & Notes Archive

see [VNF Requirements Project Meetings](#)

Project Relationships

LFN code of conduct applies <https://lfp.projects.org/policies/code-of-conduct/>

Community Participation

ONAP measures community participation using the Bitergia tool.

[Bitergia view of vnfrqts](#)

ONAP procedures for committer promotion requests require consideration of community activity.
