

Configuration Persistence Service Meeting Notes & Recordings

Date Range

May 1, 2020 through December 31, 2020

R6 DISCUSSION

TOPIC	DISCUSSION
R6 CCSDK-based Solution	<p>Project as part of CCSDK (Yuriy Malakov)</p> <ul style="list-style-type: none"><input type="checkbox"/> ACTION: Sandeep Shah Presentation of new architecture with CCSDK (Yuriy Malakov). How much bandwidth/capacity does Sandeep Shah have.<input type="checkbox"/> ACTION: Development demo & progress (1) ORAN Yang models & data schema not available yet (waiting) & 5G Service Modeling U /C: 3GPP TS28.541/TS28.540. maps to a data structure we want to support. (2) can proceed to Dockerize solution. R4 MariaDB solution. could extend the model. (3) Review work from Ted. waiting for project.<input type="checkbox"/> ACTION: Give RC0 status - Sandeep Shah on RC0 status. Set up call with Sandeep Shah 2: Frankfurt Release Integration Testing Status / Frankfurt Release Key Updates
R6 Integration on Updates	<p>(Swami) For the CPS requirement in Guilin (REQ-322), we noticed that Reshma/my name is included as Integration Leads. For the impacts related to SON use case, which will be covered as part of the SON use case testing, this is OK for us. However, we are not be able to commit resources at this time for testing additional aspects (if any) – of course, I can still check during the time of testing reg. the feasibility to cover any additional aspects.</p> <p>(Swami): June 10, 2020:</p> <p>The Config DB which is the predecessor CPS (or as we knew it earlier) supports CRUD operations – in particular it supports APIs such as the foll. It's APIs are used by SDN-C (R) to write into it, and by SDN-C (R), OOF and DCAE (SON-Handler MS) to read from it. I am not sure if there is a formal documentation in readthedocs – perhaps Sandeep can confirm.</p> <ul style="list-style-type: none">• GET /api/sdnc-config-db/v3/getCell/{cellId}• GET /api/sdnc-config-db/v3/getCellList/{networkId}/{ts}• GET /api/sdnc-config-db/v3/getNbrCellsNetwork/{networkId}• GET /api/sdnc-config-db/v3/getNbrList/{cellId}/{ts}• GET /api/sdnc-config-db/v3/getPci/{cellId}/{ts}• GET /api/sdnc-config-db/v3/getPnflId/{cellId}/{ts}• PUT /api/sdnc-config-db/v3/createNbr/{cellId}• PATCH /api/sdnc-config-db/v3/modifyNbrHO/{cellId}/{targetCellId}• PATCH /api/sdnc-config-db/v3/modifyPci/{cellId}• PATCH /api/sdnc-config-db/v3/modifyPnflId/{cellId}• DELETE /api/sdnc-config-db/v3/deleteNbr/{cellId}/{targetCellId}

R7 DISCUSSION

Topic	Discussion
R6 / R7 ReadtheDocs	<p>Read the Docs</p> <ul style="list-style-type: none"><input type="checkbox"/> ACTION: Update ReadtheDocs https://git.onap.org/integration/tree/docs - Jira under Integration - invite team for review - invite PTL (Morgan R.) -Gerrit PTL submission +1 from reviewers. committer/Morgan +2 (someone in Integration project will do the Merge)<input type="checkbox"/> New project Repo DOC directory (RST) in that Repo Andreas Geissler Signoff for R6 May 2020; M0 for R7. If we are approved by TSC as a new project create a new Repo
R7 Guilin Content / requirements	

Requests for R7 Requirements are up.

Guilin release - functional requirements proposed list

Timeline - Sign-off for R6 is May 7. Historically M0 kickoff for R7 is May 7th

PROPOSALS FOR R7 GUILIN FOR WHAT WE PLAN TO BE DOING IN R7:

1. R7 Project Proposal (identify PTL, Project proposal, setup repo)
2. =STEP 0= Initial Database Setup
3. =STEP 0= (Design time), (Setup DB) Yang Model development ORAN specification Yang Model in line with 3GPP. SQL structure.
4. =STEP 0= Schema design & API
5. =STEP 1= CMNotify generated by RanSIM extended (final standard format).
6. =STEP 1= VES generation, Nokia Simulate DU simulate VES CMNotify message.
7. =STEP 1-6= CMNotify (Nokia) Integration Step 2,3,4 with SON work Step 1,5,6
8. =STEP 5/6= Mapping CMNotify contents into DB
9. =STEP 5a= New Development for Independent component to get VES off of DMaaP
10. =STEP 6= API Updates
11. =STEP 6= Interface to RTCDB (writing DB from SDN-R or RCDB-stand-alone-component)

SUMMARY OF THE STEPS FOR RTCDB "HOW IT OPERATES" (Reference):

- **STEP 0:** Design time, Setup DB schema & API (Onboarding).
 - **STEP 1:** xNF (RAN Simulator) GENERATES a VES CMNotify - Wipro SON (R6 Done)
 - **STEP 1a:** Simulator of VES CMNotify/"Standardsdefined/CM" (Nokia) (R7)
 - **STEP 2:** DCAE VES Collector RECEIVES the CMNotify (VES) - Nokia (R7)
 - **STEP 3:** DCAE PROCESSES VES Event- Nokia (R7)
 - **STEP 4:** DCAE PUBLISHES onto DMaaP - Nokia (R7)
-  [REQ-327](#) - ONAP/3GPP & O-RAN Alignment-Standards Defined Notifications over VES (Guilin) DONE
- **STEP 5:** CCSDK (Controller) LISTENS to DMaaP - [Sandeep Shah](#) (R6 Done) (R7)

 [CCSDK-2392](#) - Enhancements for OOF SON use case in Honolulu release CLOSED
 - **STEP 5a:** RTCDB (stand-alone component) LISTENS to DMaaP (R7 new)
 - **STEP 6:** RTCfgDB UPDATES DB with info - [Sandeep Shah](#) / Techmahindra (R6 Done) (R7)

A&AI FLOWS:

STEP 1...6: Initial A&AI setup of DB (the setup of the DB with the initial set of all xNFs a "getall")

STEP 1...6: A&AI Update (e.g. a new xNF is added or deleted)

R7 Topic	Description & Links
Usage of CPS - OOF /SON /PCI (Cell info)	<p>Virtual F2F mentioned the CPS project.</p> <p>Those other use cases have dependency to Use cases.</p> <p>We need to attend U/C weekly meetings; sync</p> <p>Guilin (R7) - Use Cases (and Requirements in Use Cases)</p> <p>Guilin release - functional requirements proposed list</p>
E2E Network Slicing (Slicing info)	<p>OOF SON interaction  REQ-345 - 5G OOF SON use case requirements for Guilin release DONE</p> <p>NFR for CCSDK/SDN-C in the Guilin Impact View per Component</p>
Harmonization (Stnd-Def VES)	
Interaction & Dependencies Use Case	<p>Interaction spreadsheet</p> <p>Sync between these teams.</p> <p>Joint meeting - Invitee on a particular in the schedule</p>
TSC Project Proposal	Configuration Persistence Service Project
Project Home Page	sample-landingpage Project Home Page
Project Repository	<p>Create Repo: Resources and Repositories (Deprecated)</p> <p>Process to create Repo. Ticket</p>
Architecture S/C	<p>Architecture Proposal</p> <p>ONAP Architecture Review process:Project Architectural Review Requirements and Process (Draft) to M1 Project PTLs/Feature Sponsors request a review by email from the chair of the arch subcommittee. The chair of the arch subcommittee creates a JIRA issue for the review and emails a link to the project PTL. The project PTL/Feature Sponsor adds the JIRA issue link to the architecture review JIRA task in the M1 epic, as confirmation that a review has been requested.</p>
R7 Wiki Page	Configuration & Persistency Service R7

For Honolulu REQ-Jira (copied from REQ-322)

Configuration & Persistency Service: (Code Impact)

- Leverage (Maria DB) as mS CPS to support the logical data model/devise model.
- Build the data model for real time presentation of 5G network and store the network element data to the CPS database
- Initialize CPS Database including A&AI setup, database schema setup, with initial values.
- Receive Config information updates from SDN-R via Netconf and with VES notification.
- Support all vendor specific Configuration Information Model (CIM/Yang)
- Impact: Code Impact
- Companies Supporting: Ericsson, Nokia, AT&T, WiPro
- Number Developers/Testers: 7

Email Swami:

PFB comment from TSC for the OOF SON requirement. With reference to resource commitment:

	<ul style="list-style-type: none"> Policy: Pam - Shall I indicate AT&T shall cover it, while we subsequently discuss what all enhancements we can do in Guilin timeframe, as well as check reg. some of the aspects where you indicated use case team should contribute (e.g., separate Drools file, which would have to be done by Wipro). SDN-R/CCSDK: Sandeep - Shall I indicate IBM? CPS: Shankar/Ben - Given the Guilin release timeframe, I think we have to go for the simplest option (1) and indicate no impact to CPS, where we only change the yang models, and SDN-R continues to do the mapping. <u>modify CCSDK solution to extend interfaces (OOF /SON/PCI Team updates)</u>. R7 Solution of C&PS (evolution "ConfigDB" = C&PS) Hard code information R6 C&PS 1.0 = CCSDK/SDNC solution / R7 C&PS 1.1 = CCSDK/SDNC evolution+MDCPS PoC / R8 C&PS 2.0 = Standalone component

Domain "Standards-Defined" NameSpace "3GPP-CM-xxxx"</p> <p><input type="checkbox"/> The CCSDK work will be in OOF SON PCI team ⚡ CCSDK-2392 - Enhancements for OOF SON use case in Honolulu release CLOSED should be mapped to ⚡ REQ-345 - 5G OOF SON use case requirements for Guilin release DONE</p> <p><input type="checkbox"/> (Generic Requirement) to consider Non-Real Time RIC Pawel Slowikowski</p>

Model Driven C&PS PoC	<p>Proposal (by Ciaran Johnston et al) as a step of Model Driven ONAP, Model Driven CPS. See slides in the Project Proposal page, and also in the R7 CPS Wiki.</p> <p>Question: Graph DB? Answer: type of data from xNF to be hierarchical which would fit in a Graph DB. doesn't have to be that though. Likely to be one or more underlying database technologies. time series.</p> <p>Question: Model driven CPS, uS on-boarding in CCSDK. If you plan to do modeling work in R7, consensus from Arch S/C. Answer: would need CPS team, modeling, Arch S/C to be aligned. Want something that can be demonstrated/delivered in R7.</p> <p>Question: Are there dependencies on platform components? Answer: TBD</p> <p>22 May 2020 - Looking at internal sourcing to get development resources. Sync with theodore johnson</p> <p>03 Jul 2020 - Status ready to cut code off of x CC-SDK repo. Ongoing analysis. Resourcing Toine has started, 2 new people will be added in August 1, 2020. Present to Architecture S/C before end of July. Engaged Modeling S/C. Visible Yang modeled to be consumed in ONAP. Modeling work will happen in</p>

State Database PoC	<p>Bruno Sakoto , Olivier Phénix</p> <p>Bell Canada Leading a PoC related to State management using the CPS project. Communication via Kafka topic (DMAaP).</p> <p>Question: Are there dependencies on platform components? Answer: TBD</p> <p>Wiki: in progress</p> <p>Bruno Sakoto - Listen to Recording from 08 May 2020</p> <p>Question from Samuli Silvius - State Management was interesting could we get the basic arch picture and def lines of description? Having references e.g. to A&AI is better solution than planned CPS to copy inventory data ANSWER: We are going to prepare a public page and share with you.</p>																

Network Slicing & CPS	<p>CPS w.r.t. Network Slicing: (Swami)</p> <p>For the Network Slicing use case, we are still working out the details w.r.to RAN slicing, and are also in discussion with O-RAN folks. We expect it to take 1-2 weeks to conclude. Once it is fairly clear, we should discuss reg. the CPS impacts for Guilin.</p> <p>For now, we have created Jira SDNC-1199 for the CPS requirements for this use case. As of now, we may not have resources to commit for implementing the updates in CPS (but still checking), in this scenario, there are 2 alternatives:</p> <ol style="list-style-type: none"> 1. The impacts to CPS (which I expect to be persistence & retrieval of some basic RAN slice config related data) can be handled by existing CPS committed resource <p>(or)</p> <ol style="list-style-type: none"> 1. The details are stored 'locally' in a DB in SDN-C for example. In the next release, it is moved to CPS. <p>(EMAIL) from Swami 27 May 2020</p> <p>For Network Slicing use case, for RAN Slicing, we will be needing a minimal set of information elements for initial RAN configuration and network slice-subnet specific configuration. Our current R7 GUILIN proposal is to extend ConfigDB with the required aspects for Guilin release, and once CPS takes off as an official ONAP project in HOLULU R8 H-release, the work can be taken over into CPS.</p>
----------------------------------	---

R8 Honolulu Discussion

TOPIC	DESCRIPTION
Requirement S/C	Presention on July 27th 27 Jul 2020
R8 TSC / Project Proposal	<p>Configuration Persistence Service Project</p> <ul style="list-style-type: none"> <input type="checkbox"/> ACTION: PERFORMANCE - Open (#@#) open items to get ballpark figures for # API requests. <input type="checkbox"/> ACTION: TSC Scheduling & Presentation - Represent at the TSC - 21 May 2020 (TSC canceled); Tues R6 status; Thursday for general topics 28 May 2020. Stakeholders of TSC presocialization Q&A. Schedule pre-review meeting w/ people who asked questions. SCHEDULE MAY 28 TSC 2020-05-28 and scheduled for JUNE 4 2020 TSC 2020-06-04 <input type="checkbox"/> ACTION: Deadline? - M0/M1 project proposal objective by the TSC. <input type="checkbox"/> ACTION: Peer Review Process Step #1 - ONAP Projects - Presentation to ARCH S/C

TERMINOLOGY DISCUSSION

TOPIC	DESCRIPTION
C&PS versions	<p>CPS 1.0 - This is the evolution of ConfigDB in the CC-SDK / SDN-C. this solution was initially coded in R3 for the OOF/SON/PCI Use Case and was referred to as "ConfigDB" using a MariaDB ITDM solution. Because in R7 GuiLin planning, there is some clarity needed to identify the different tracks of development, the notation is introduced here, "CPS 1.0" to allow people to have a common "language" to refer to a body of work. This was done in the R6 time frame.</p> <p>CPS 1.1 - This is the continuation of the CPS 1.0 solution (see above). Updates will involve schema and interface changes for additional data supported in the CPS database. This will be introduced in the R7 Guilin time frame. Thus, when someone refers to CPS, in the R7 time frame they are referring to the CPS 1.1 solution. Additionally, there are two CPS related PoC going on the Model-Driven CPS and State Management PoC (Bell Canada) and when referring to R7 CPS, work done in these PoC are also included.</p> <p>CPS 2.0 - CPS 2.0 is the stand-alone project. In R8 Honolulu, the goal is to have CPS become its own stand-alone project. Thus, a presentation to the Architecture S/C and TSC will be made again to petition for a stand-alone project.</p>

SQL templates. Possible S/W sharing? A CPS user (model/yang) driven. To do a query, the consuming mS composes an XPath (composite) query. To abstract the query, the mS could help. q.v. a query mS maps to XPath queries & presents. ■ DCAE DES - Will be presented at 04 Nov 2020 DCAE Call. Developed by Chinamobile team as part of KPI monitoring functionality. ■ DCAE DES - will be used for both OOF SON & E2E Network Slicing (U/C mtg Mondays) ■ DCAE DES & PM - Templates for PMs. KPI monitoring. #1 aggregate & store-fetch data & SQL query > #2 calculate, KPI, policy > #3 present to user. PMmapper. RT Data > computation. Not yet done. Generic formula. Config policy loaded. PMmapper filtering vs normalizing. Raw PM Counter Data (3GPP & VS PM) KPIs. Network slicing team is working on this. ■ DCAE DES w/ External DBs - Can plug in external DBs? Starts with simple MongoDB. SQL templates. Presto SQL Query engine. ■ Store & Reexecute previous queries.
