Developer	What I've Done	What I'm going to work on	Issues need help to resolve
Pamela Dragosh	Tutorials Control Loop	continue	Just noting that in trying to use the scripts that folks developed to run the S3P tests, not easy to configure locally to setup and run the containers. Need easier way to setup local dev environment in order to play with and test code. Stealing the docker-compose for xacml PDP CSIT to start, perhaps that can be housed in policy/docker again to keep it in the policy repos (Integration CSIT may be going away)?? One compose file instead of multiple ones?? VACATION: 7/22-27

Pamela Dragosh	Tutorials Control loop	continue	
Jorge Hernandez	Windriver labs unresponsive - try to recover VMs, but couldn't as they were in the ERROR state, and not authorized with nova operations. Created OPENLAB ticket. Blocking testing for Frankfurt POLICY-2678 OM changes testing. Spend time looking at tdjam contributions, and necessary infrastructure to support DMN controllers in the near future. POLICY-2673 : exec pdpd option (compatible with existing background options) - merged (kubect logs). This work would also be needed by the REQ Ajith is working on to exit on error, as JVM process will run by default in lab installs in the foreground. This works in in drools-pdp image.	Continue with POLICY-2673 , to add companion changes to control loop pdpd image. POLICY-2678 , hopefully can close with lab problems resolved on Frankfurt tests.
