23	SO query in AAI	Shashikanth Vithal	DONE	<p>NNI Use Case - discovering 2 topologies from the network</p> <p>Use case is asking for the ability in AAI to link an underlay and overlay together by having a cousin relationship between 2 PNFs. Asking Chandra Cinthala to verify if that edge is in the Frankfurt release.</p> <p>Per Chandra: "I think pnf -> pnf edge is redundant and not needed as we can traverse (thru a logical or physical interface) from pnf -> p-interface/l-interface -> pnf."</p> <p><input type="checkbox"/> Shashikanth Vithal will let the AAI team know if that solves the problem</p> <p>Chandra Cinthala please note: According to Shashikanth Vithal, the team requires a relationship from an overlay topology node to an underlay topology node; by using the p-inter cannot traverse to underlay node. Suggest to allow an edge for PNFPNF, which is consistent with RFC 8345 model</p>
