|                 |   |              |               |
|                 |   |              |               |

## ATTENDEES

## NOTES

- CLAMP - frankfurt is fine, nothing to report waiting for sign-off.
  - Guilin - main features will be self-serve will require the most development.
  - policy filtering, and native policies should be Test Only for Guilin
  - Import/Export Control Loop and Policy version control features need user story and are 2 feature coming from internal AT&T.
- Discussion on Control Loops, how they are defined. The role of SDC, DCAE-MOD, CLAMP. Potential for a POC in Guilin to use TOSCA as a definition for a Control Loop.
- Policy - see above wiki
