

RAN Slicing Flow

- [Allocate NSSI:](#)
- [Modify NSSI](#)
- [Terminate NSSI:](#)
- [Activate NSSI:](#)

The following sequence diagrams show the allocation, modification, termination and activation of a Network Slice Subnet Instance (NSSI).

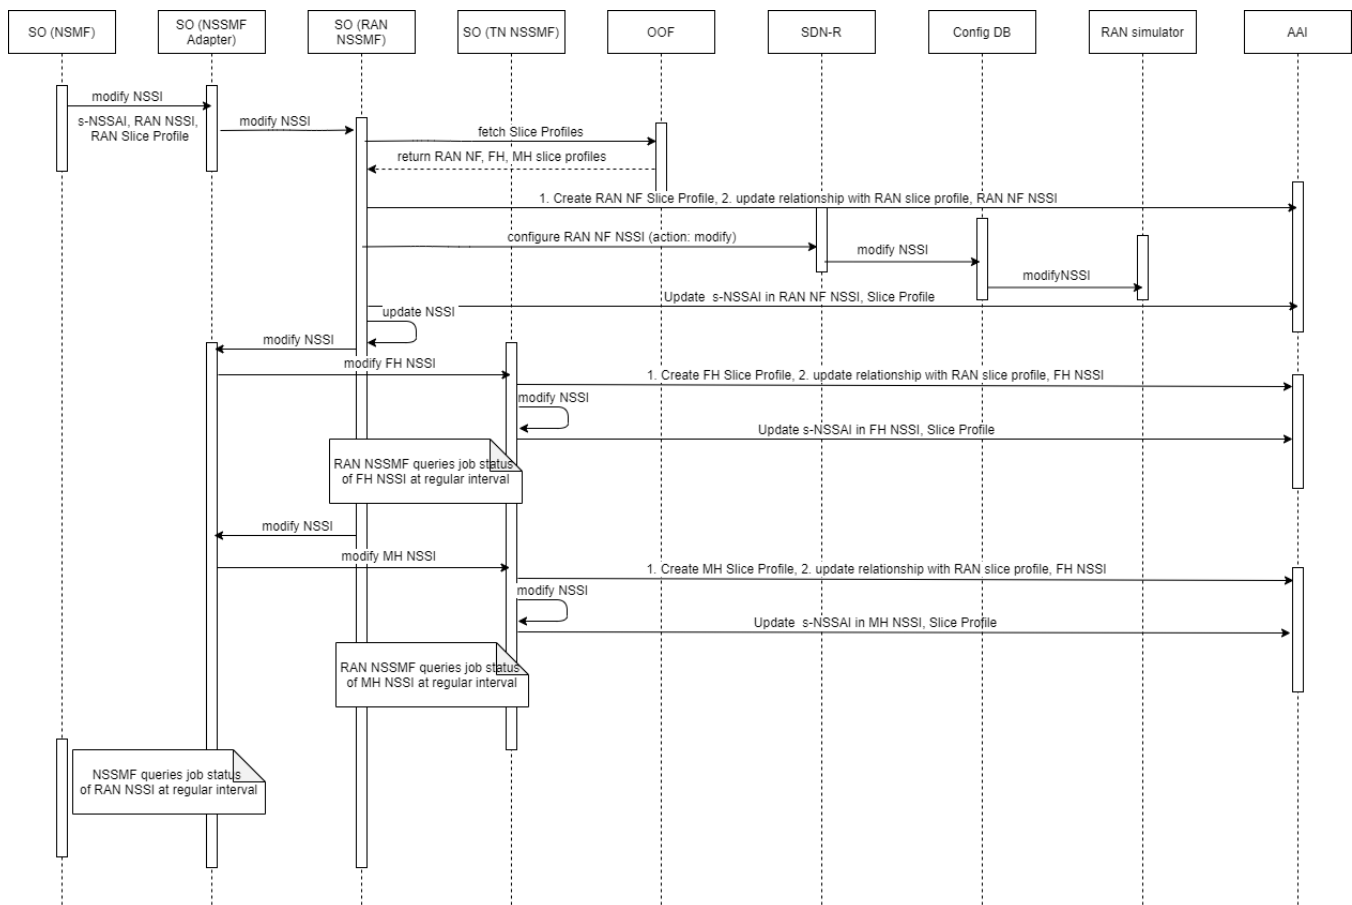

Allocate NSSI:

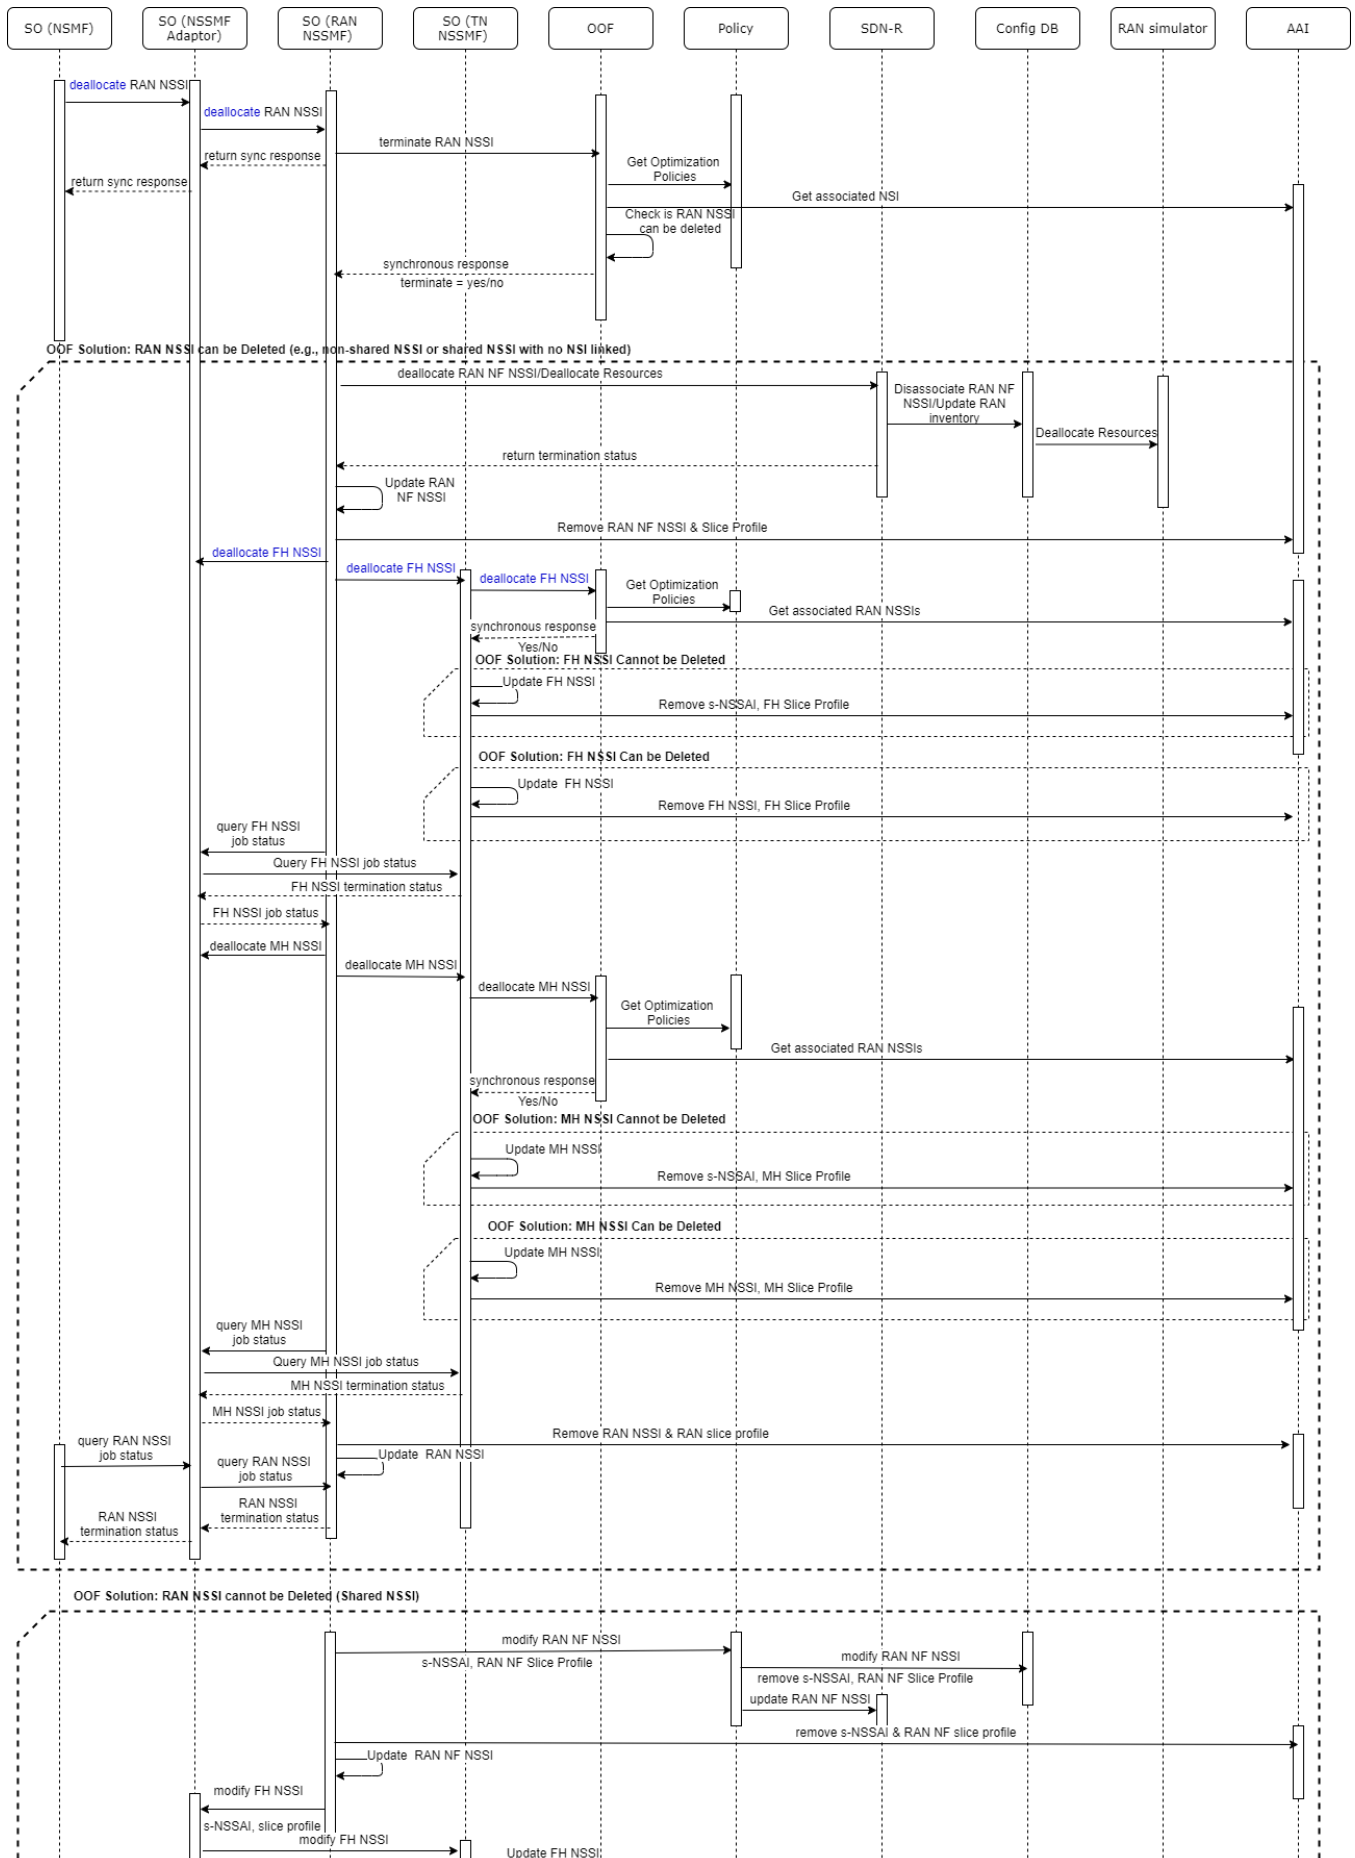

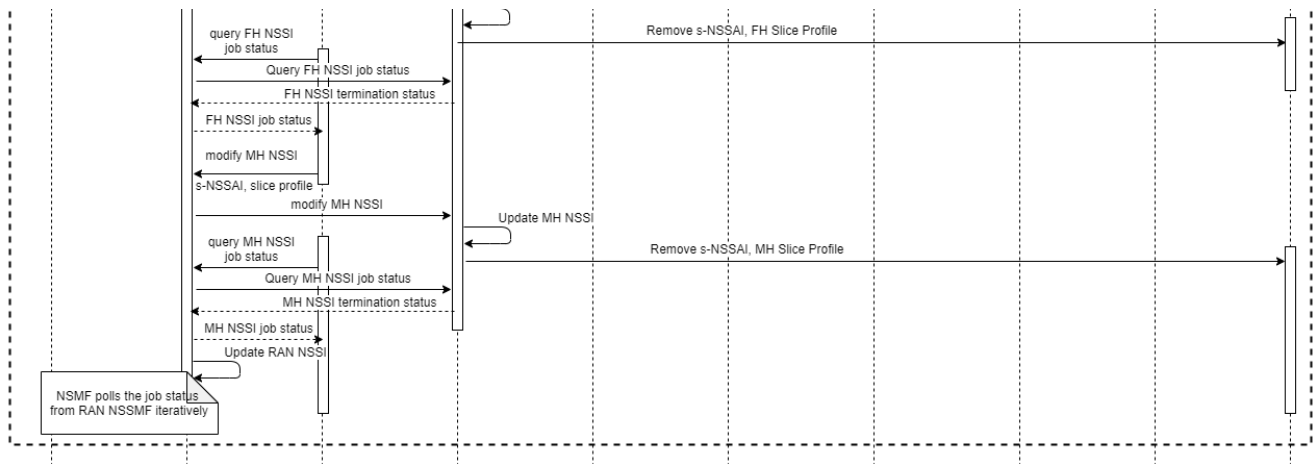

Modify NSSI

- This flow depicts the scenario of modifying constituent NSSIs when OOF suggests to reuse the existing NSI itself. Detailed view of 22.a, 23.a in [N SMF and Common NSSMF](#)

Terminate NSSI:

Activate NSSI:
