A1 Adaptor from NRT RIC from ONAP DCAE . SMO as ONAP or other. What is the source of A1 policies? ANS: some application sitting above ctrlr ask ctrlr to fwd over A1 I/F in R7 introduce A1 policy mgmt svc to coordinate A1 policies in RAN and keep a synced view of policies handle multiple versions of A1 I/F. Instructions to generate policies need an app - "RApp" executes in ONAP env. generate requests for A1 policies. coming from ctrl loop app (CLAMP, DCAE mS). Controllers NBI to create policies.</p> <p>The policy component in DCAE. OSC A1 policy mgr, <a href="#">ONAP policy framework</a>.</p> <p>ONAP policy framework - no overlap in policies &amp; A1 I/F policies. A1 policies cfgs sent over A1 I/F to RAN.</p> <p>Does the "RApp" exist? ANS: still being defined in WG2. try to define. in ONAP ~ctrl loop (CLAMP). DCAEMod.</p> <p>Q: a challenge - coordinate two open source communities ONAP &amp; ORAN. setup a separate repo for ORAN work to track release w/ ORAN releases. different repo in Gerrit. to make a separate release build. coordinate OSC as a downstream project entire SMO project building on ONAP - A1 control function other coordination for O1 "traditional OAM" / O2 "virtual I/F mgmt I/Fs. data coordination ML model mgmt" wi SDNC CCSDK. eventually C&amp;PS A&amp;AI. RApps. Studying running in ORAN to see results in coming months (R7). basis in Sandeeps work.</p>

(will resend email)</p> <p>Question #2. The way I compile for a test/dev env w/ <u>docker compose</u>. building docker images containers in VM or do we need helm charts? what's the best way to use helm charts? can't bring SDNC w/ A&amp;AI. you can bring up your own env, but it isn't always easy to figure out the dependencies. can run A&amp;AI separately send API responses from A&amp;AI; SDN-C docker. MariaDB galera. Elastic search. but still SDNC doesn't run. Is there a wiki page to help?
