

# Code Scanning Tools and CI

This section is focused on describing how CI is connected to our different scanning tools and how the code scan generates the resulting reports.

Currently, we have 3 code scan tools linked in our Jenkins CI:

	NexusIQ	WhiteSource	Sonarcloud

Quality Gates	High thread violations need to be addressed and investigated in case they are false.	Currently this is not a release blocker. The reports are being used for testing purposes.	Quality Gate must be above 55% to pass.  Test coverage is managed by tech teams
