Meeting Logistics

Day	Time	Meeting ID	Zoom Link	Join by phone
Monday	[sdc] Team ONAP3, Mon UTC 11:00 / China 19:00 / Eastern 06:00 / Pacific 03:00	https://lists.onap.org/g/onap-meetings/calendar	See Groups.io calendar invite	See Groups.io Calendar Invite

Note that a Waiting room has been added to the meeting room, the host will let you join once identified

Meeting Attendees

TBD - see recording

Agenda & Minutes

Review open action items from last week

Agenda	Minutes (Draft to be updated during call)	Sli des
JIRA Updates - High priority defects - Open Reviews - Defects & tasks backlog - Others		

High priority defects for Guilin:

T	Key	Summary	Assignee	Reporter	P	Status	Resolution	Created	Updated	Due

No issues found

- Other High priority ticket to discuss ?
- SDC 1.7.3 is out and merged on master / Guilin, fixing most issues

Open Reviews :

- https://gerrit.onap.org/r/q/status:open+AND(+project:sdc+OR+project:sdc/microservices+OR+project:sdc/jtosca+OR+project:sdc/sdc-be-common+OR+project:sdc/sdc-distribution-client+OR++project:sdc/sdc-docker-base+OR++project:sdc/sdc-titan-cassandra+OR++project:sdc/sdc-tosca+OR++project:sdc/sdc-workflow-designer+OR++project:sdc/sdc_common)

New features review / Bug fixes for H release

oom reviews:

[SDC] Support setting SDC-BE configuration at deployment time Still in Progress? was off for a while not sure about status

investigating locally, problem is related to secrets mapping, last gating run shows secrets are not properly translated (CS INIT job failing)

Gerrit REVIEW can proceed with auto test in verify job, now accepting changes for Honolulu

- Reminder of merge conditions : Verify must pass AND tests must be provided for new features (SONAR metrics are important but can only be checked AFTER code is merged)

Important : for new features, please provide explanation of changes and API/UI/unit testing, it is also advised to present changes at SDC weekly

we have a plan to add SONAR test to the verify job, will work on this in the coming months

Note : SONAR rules have changed (TS profile) and we've lost about 1% coverage, will work on increasing this in next release

Defect & Tasks Backlog :

- Shared effort to reduce backlog - **49 defects left**: https://jira.onap.org/issues/?jql=project%20%3D%20"Service%20Design%20and%20Creation"%20AND%20issuetype%20%3D%20Bug%20AND%20status%20not%20in%20(closed%2C%20Delivered)%20ORDER%20BY%20status%20DESC
- Maintain **NewComers** label for new easy tasks
- 12 are documentation tickets (also for New comers)
- Some are very old, need to review them (post RC2 probably)

T	Key	Summary	Assignee	Reporter	P	Status	Resolution	Created	Updated	Due

No issues found

- Use the AID (Architecture integration document) SDC Data model also for new comers

Others:

- **PLEASE CLOSE JIRA issues if you can**
- SDC Mentorship with LFN - https://wiki.lfnetworking.org/display/LN/2020+Mentorship+Projects

  - https://wiki.lfnetworking.org/pages/viewpage.action?pageId=38863598
  - https://wiki.lfnetworking.org/display/LN/Project+Plan%3A+ONAP+Security+Requirements+-+SDC

Amir status :

In progress, working on SNAKEYAML upgrade, anyone can look at his proposal (see gerrit review WIP)

current update : we got two tests failing after the update, seems the behavior of the parser has changed

Proposing to Amir to push his code as a gerrit review (even if failing) so that community can see & help

Reminder for people to have a look

New ONAP release plan :Guilin SignOff on Dec 3rd

Honolulu release in progress according to new release cadence process (should be less admin work)

Release planning discussions happened last week, in short : Release is for First quarter next year

	link to release planning wiki : Release Planning: Honolulu	
Automated Rolling Upgrade and Data Migration	**No Update this week** Support of automated upgrade from version X to version X+1 Needed for every change that breaks existing data validity : Have a strategy to handle data migration **Create a wiki page**, details for every feature and its impact on data for migration / schema changes - check the wiki page: Upgrade plan - Feature X: All services metadata must have new property Y **Implementing** a "task" for migrating data accordingly. - Example: asdctool mig2002 **SDC-3155** - Getting issue details... STATUS Epic created Discuss further and create User stories along with Bell Canada, Amdocs, Tata communications Will need to prioritize VS Guilin Requirements this may shift to next release due to low commitment Learn from SDNC experience; "Normatives" types: challenging	
Important Jira tasks we need to pick up Long Term tasks	**No Update this week, most tickets defered to next release** ~~Aligning SDC dependencies - high priority tracked under Guilin Reqs~~ - SDC-2708 Add assertions for unit tests - #NewComers - SDC-2812Refactor all usage of Eithers - Guilin R7, #NewComers - SDC-2844 JUnit 5 unit test - on going for new UT **SDC-3108** - Getting issue details... STATUS Migrate all TestNG tests to Junit5 , #NewComers - SDC-2688Upgrade Selenium - Guilin R7, **André**	
Security - Guilin	**Looking at these and this will significantly impact SDC APIs, since SDC does not have password it has to defer request to portal/aaf** **exception for this in Guilin requested , though PORTAL provided Credentials validation API so that SDC can check users - will see if we have time to do something about these** OJSI tickets open on SDC Need to investigate these for H | type	key	summary	assignee	reporter	priority	status	resolution	created	updated	due | ⚠ Jira project doesn't exist or you don't have permission to view it. View these issues in Jira	

Guilin requirements	**PROPOSING TO CLOSE OFF GUILIN REQ review as we are approaching END OF RELEASE**
	
	M1 commitments reviewed with tSC M1 is approved implementation in progress, Any progress update ?
	
	See M1 tracking table :
	
	SDC R7 M1 Release Planning
	
	    • Control Loop in TOSCA (PoC) - Ericsson
	        ◦ TOSCA Defined Control Loop PoC in ONAP Rel G and in Rel H
	        ◦ **No News on this ? POC did not involve SDC (demo at DDF on CLAMP)**
	    • CNF enhancements , Orange - **SDC-3182** - Getting issue details... **STATUS**
	
	   Testing in progress on Windriver lab, got consul fix this morning that was creating Zombie processes and killing the lab, trying to complete testing this week
	
	    • ETSI changes, most of reviews are merged ? waiting to see if more changes required following Integration tests -# all done now ?
	    • Test Topology Auto Design - waiting review for test code, review received, some comments provided
	
	Remaining items for Guilin :
	
	Documentation update has been pushed, some minor glitches to fix this week (links broken) DONE
	
	A couple of bugs have been fixed, will release 1.7.3 as final build DONE
	
	Final JIRA Cleanup DONE
	
	Non Functional progress :
	
	All is implemented, looking towards H release requirements
	
	~~Status of Pair wise testing :~~
	
	~~SDC Pair Wise Testing for Guilin Release~~
	
	~~COMPLETED~~
	
	Optional - No Update this Week:
	
	Amdocs/YoppWorks to work on Multi-Tenancy (Stretch Goal For Guilin) did not get news about this
	
	Cucumber api ci - TBD
	
	New Profile Feature
	
	SDC Type Management
	
	Configuring UI tabs (R6 backlog)

Reviewing last week's action items	see below
Q&A	If you have time, pay attention to SDC mailing list questions
Honolulu Requirements	New requirements for H release are now open, See : Honolulu Release Requirements and impact per components : Honolulu Impact View per Component Will create release planning template details, tracking stories and EPIC + committments Please plan to present your changes at SDC weekly (I'm planning to cancel SDC weekly on 12/21 and 12/28)
Discuss SDC-2661	**SDC-2661** - Getting issue details... **STATUS** Is this still needed ? Triggered by Jira comment to see if we should pursue this or not

Action Items ()

- Chris to contact Sylvain/oom team for the pending OOM review in progress, testing locally, provided fixes

<u>Rocket Chat channel :</u>

http://onap-integration.eastus.cloudapp.azure.com:3000/channel/sdc

SDC Dev lab on Windriver :

ssh ubuntu@10.12.6.10 (with onap key)

10.12.6.10 - updated to 1.7.1 (STAGING latest) and installed most of ONAP components.
